(54) Title: POINT-OF-INTEREST DISPLAY SYSTEM

(57) Abstract: A point-of-interest display system (20) includes an updateable database which interfaces with a microprocessor (50) which receives data from a GPS receiver (40) providing the system with current vehicle location and direction of travel information. A display (26) provides the operator textual and elemental graphic display information, and easily accessible control switches (24) allow the operator to select upcoming highway exits, categories of points of interest, and point of interest and display directions to a selected entry.
